

Stikkontrol • Stechkontrolle • StICK control

**VISSTIK**

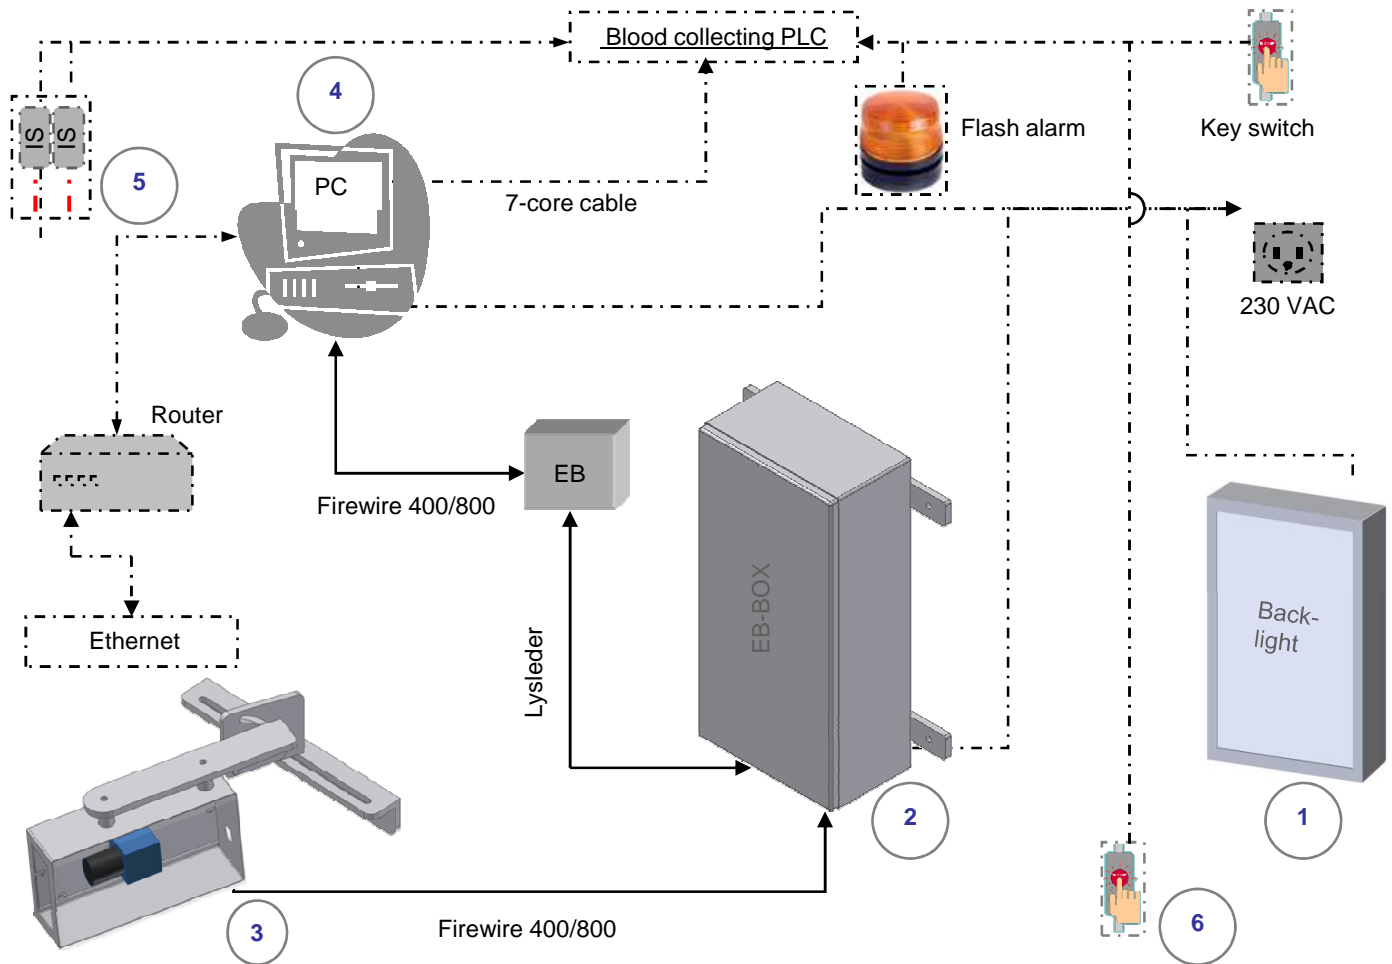

**NEWS**

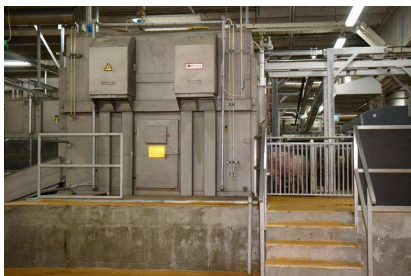

- Automatic stick control to assure that all pigs have been stuck correctly.
- Avoid live pigs in the scalding process.
- Easy to install and no down time.
- The patented system is based on vision technology.
- The system consists of a camera which by means of a lamp with constant backlight takes two images of each pig. Software controls if blood is running from the pig.
- If Pic. 1 = Pic. 2 the conveyor automatically stops for manual control and sticking.
- Interface to remote PC
- Automatic alarm and stop of line
- Capacity: 1400 pigs per hour

**Welfare matters**

1 = Backlight, 2 = Extender box, 3 = Camera box, 4 = PC, 5 = Inductive sensors, 6 = Alarm receipt button

**Butina & Anitec**

The suppliers of complete solutions consisting of:

*Pigs handling systems;
